### Double Dog Communications Does It Again

*Double Dog Communications closes second acquisition this quarter with Purchase of MT Wirefree and expands Fixed Wireless Network.*

**YORK, PA** – May 28, 2008: “We are excited about our second acquisition this quarter,” Scott Austin, Double Dog Communications President said regarding the acquisition of MT Wirefree. “We are pleased to have closed the MT Wirefree deal as it added 10 additional towers and hundreds of fixed wireless Internet customers.”

Based in York, Double Dog Communications has become the Internet Service Provider (ISP) of choice in central Pennsylvania and has further expanded its reach, penetration and presence with the purchase of MT Wirefree fixed wireless Internet customers.

MT Wirefree entered into the agreement because “We realized that MT Wirefree had grown to a size at which it required full-time focus to serve the customers.” said former MT Wirefree owners.

This acquisition clearly places Double Dog Communications as the #1 Fixed Wireless Internet Service Provider in Central PA. “There is nothing better than owning your own Network Infrastructure,” said Dave Hagan Chief Operating Officer. “ This now completes our southern network in Pennsylvania and Maryland giving us over 85 towers, and will allow us to focus building our network in other areas.”

With the expansion of Double Dog Communications service area, Austin feels the increased presence in Southern York County and Northern Maryland and surrounding areas will fuel the growth of Double Dog Communications Business class services such as high speed Internet access, Web site design and hosting, eCommerce solutions, Advertising and Marketing solutions, Wide area network solutions and technical consulting.

#### About Double Dog Communications
